

Environmental Chemistry Advanced™

The *Environmental Chemistry Advanced™* course has been developed for environmental professionals without extensive chemistry education or training. The instructors draw on many years of applied, practical environmental chemistry experience to provide straightforward, understandable explanations of the chemistry considerations and issues that impact important environmental compliance management considerations.

Learning Objectives

- Understand chemistry considerations and issues that impact important environmental compliance management considerations
- Address permit conditions, discharge and emissions limitations, hazardous materials and waste storage and management standards, safety requirements, laboratory analytical reports, and environmental site assessment results

Intended Audience

- Environmental professionals
- A chemistry background is not necessary

Format

- Modular presentations cover all principle environmental laws and implementing regulations
- Collaborative and comfortable atmosphere, with questions and discussion encouraged
- Regular breaks to allow students to stay in touch with office or attend to personal matters
- Coffee, drinks, and snacks throughout the day

Students Receive

- EH&S background primer sent in advance of course
- Hard copy of all slides and instructional/supporting information in convenient reference binder
- Guidance documents and useful references loaded on a flash drive
- Access to instructors for follow-on questions

Dates: July 18th - 19th, 2019
